

# FaxMail Gateway

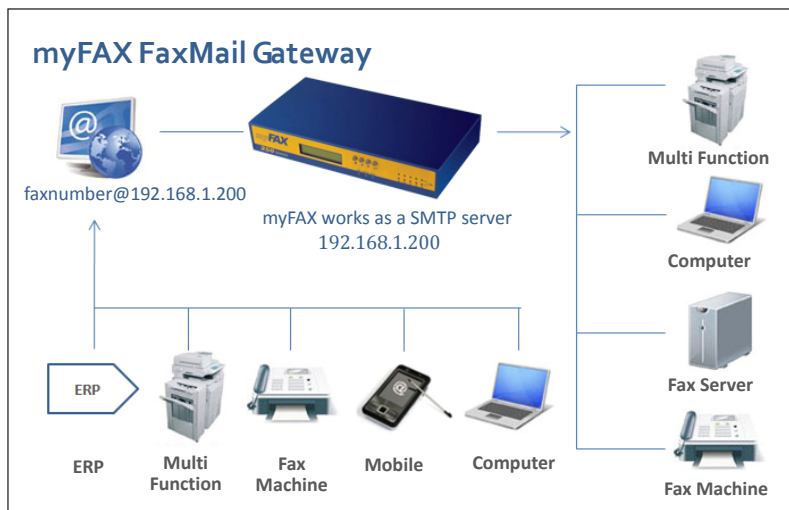

## myFAX Mail-to-Fax Gateway Application

myFAX released FaxMail new function now. For this function myFAX is able to integrate with ERP , HOST, API or any other systems which supporting sending email. For more information please go ahead...

### What is FaxMail?

FaxMail is designed for use in constructing electronic mail to facsimile gateway services. It takes an electronic mail message on standard input and converts it to TIFF in a form that is suitable for transmission as a facsimile.

### How does myFAX FaxMail Gateway works?

With FaxMail Gateway function, myFAX Network Fax Server will be a special SMTP server. It will listen for SMTP requests with an appointed domain name on port 25, and convert them into out-going fax jobs.

### What are the benefits?

- myFAX will be much easy to integrated with other systems by this FaxMail Gateway.
- The source address where the email comes from will get a notification email when the fax job is finished (done, failed or killed).
- Mobile and remote professionals will especially benefit from myFAX FaxMail gateway with immediate, personalized, and unobstructed access, anywhere-anytime.
- Mail can be send as PDF, TIFF and Postscript attachment, or only be send as a plain text email.
- Web-based administration and configuration tool.
- Eliminates the need for an internet connection.
- You can set a maximum number of messages to deliver simultaneously to the same host.

### What are the main differences between the existing Email2Fax?

	FaxMail	Email2Fax
Function Role	SMTP gateway, Connector	Need additional email server
Message send to	<a href="mailto:faxnumber@domain.com">faxnumber@domain.com</a> Or <a href="mailto:faxnumber@192.168.1.200">faxnumber@192.168.1.200</a>	Specific email box address
Email Subject	No limitation	Specific format "ValidationCode,Account,Sender,Recipient@number"
Fax Format	Plain text email, PDF, TIFF, Postscript	Plain text email, PDF, TIFF, Postscript
